Concert Technologies Receives BICSI CEC Approval for VeriStructure® Training Program

FOR IMMEDIATE RELEASE

Concert Technologies Approved as BICSI Continuing Education Credit (CEC) Provider for VeriStructure® Contractor Training Course.

DULLES, VA, September 24, 2018—Concert Technologies is pleased to announce they have received approval from BICSI to grant CECs for their [VeriStructure®](#) program's Infrastructure Verification as a Service (IVaaS) Contractor Training Course.

This eligibility makes the program the industry's first entity to be authorized to provide BICSI-accredited training for the verification and documentation of distributed campus ICT infrastructure.

The BICSI CEC program is designed to standardize global policies within the association and enable BICSI credential holders to maximize their training resources. The VeriStructure® IVaaS Contractor Training course teaches telecommunications professionals a standardized approach to the verification, documentation, and maintenance of complex, distributed infrastructures.

"The BICSI approval for the IVaaS Contractor Training Course is a big step towards industry wide standardization of telecommunications infrastructure asset management and documentation," said Dennis Mazaris, CEO and President of Concert Technologies.

VeriStructure® is as a [Platinum Award-winning program](#), honored by Cabling Installation & Maintenance Magazine (CI&M) for Outstanding Achievement in the Value-Added Program for demonstrating groundbreaking innovation by the judging panel. The program was also featured as the [cover story](#) of the February edition of CI&M Magazine.

About Concert Technologies, Inc.

Concert Technologies is a global technology rollout company with over 20 years of experience helping enterprises optimize their IT environments with a wide-ranging portfolio of programs and services. They offer commercial and government organizations transformational solutions in the planning, deployment, implementation, and management of nationwide and international technology deployments, ICT infrastructure consulting, IT asset management, and network structured cabling and wireless solutions.

Their project management methodologies ensure the deployment of cost-effective solutions and drive high satisfaction ratings from customers, partners, and employees.
